

ENERGIST

Working for you

Energist offers the ultimate light based devices and solutions for your aesthetic business with our broad range of VPL™ products to the ReGen™ LED System. All Energist products are designed to do multiple treatments. That helps minimize your investment, and maximize the return – quickly!

The Energist systems perform an amazing variety of treatments on all skin types: hair removal, photo-rejuvenation, sun damage, fine lines, wrinkles, underlying vascular conditions such as rosacea and facial telangiectasia, reduce and improve active acne, thread and spider veins on legs, warts, port wine stains, scars, cherry angioma, and more!

The Energist range of products offers the ultimate solution your aesthetic business no matter the type or size. By providing a range of high quality products, Energist helps grow your business by offering quality treatments and results. Energist clinical training and support are exceptional, and the implementation of our wide range of marketing programs and plans insure your success.

UltraPlus

Hair Removal, Skin Rejuvenation plus Acne

ENERGIST 
SPECIALISTS IN LIGHT TREATMENT SYSTEMS

UltraPlus, using VPL™ technology, is the most powerful light treatment system available!

UltraPlus

UltraPlus is the latest VPL™ system from Energist – specialists in light treatment systems. Using world renowned and proven Variable Pulsed Light Technology, the UltraPlus has the power and versatility that you need to offer specifically tailored hair removal, skin rejuvenation, vascular and acne treatments to clients with all skin types.

The UltraPlus VPL™ system is simply the most powerful and advanced aesthetic treatment system available. With infinite pulse variations and energy output levels reaching 90J/cm², the UltraPlus VPL™ system offers an extremely powerful solution for all of your aesthetic needs.

The flexibility of the UltraPlus VPL™ system to perform the wide range of treatments with a single system means you reduce your capital outlay and opens up your business to previously un-tapped revenue streams. The possibilities are endless!
